# Stonker Deck Collection by u/ClearEye2428

A foreword from the artist

Hello Apes,

The idea of the StonkerDeck Trading Cards came from my love of sports cards and my interest in documenting the moment.

They are designed to be fun, engaging and free to collect for all apes, under no circumstances are any of the cards meant to be interpreted as branding individuals as hero's of the community or moment...they are not, never have been and never will.

I ask each of you to enjoy and collect the cards because when the MOASS is over these cards could be valuable collectors items you get to share with your grandchimps.

Have fun and happy collecting.

When I was positioned short—meaning I needed it down—I would create a level of activity beforehand that could drive the futures." He also encouraged hedge funds to engage in this type of activity because it is "a very quick way to make money."

### THE #WSB TAKEOVER

February 2021

*A power struggle is rocking r/wallstreetbets, the Reddit forum that sparked the meme stock craze. And it likely all comes down to greed.*

*Starting on Wednesday the 3rd, at least three moderators for r/wallstreetbets posted that they had been banned from the forum, allegedly in a hostile takeover executed by older moderators. "We've been taken hostage by the top mods," wrote the user "132" in a now-deleted but archived post. "They left for years and came back when they smelled money."*

*It appears over a dozen users who were added to r/wallstreetbets as moderators eight or nine months ago have since been removed.*

*Another two moderators have resigned from their roles in protest and moved to a new subreddit at r/wallstreetbettest, where they're accusing the old guard of trying to cash in.*

*The original founder of r/wallstreetbets, Jamie Regeznicki, this week sold the rights to his life story to a movie production company, according to the Hollywood Reporter.*

*In the meantime, those on r/wallstreetbettest are calling on Reddit to restore the banned moderators to the original forum. Reddit didn't immediately respond to a request for comment.*

However the meltdown was topped off with the comment "Yeah I went to Harvard to get stupid!" Well Mr Cramer, Apes have shown you and your co-workers that you can go to Harvard and still get fucked by a bunch of home schoolers.

### ROBBING THE HOOD

January 28th, 2021

Robinhood has added new limits to its app to restrict users from buying or trading any of the popular Reddit r/WallStreetBets stocks, including GameStop (GME), AMC (AMC) and BlackBerry (BB). Users will still be allowed to close out existing positions but won't be able to buy more of the stocks.

Quite a number of Robinhood users expressed their surprise on social media today that the app was selling off their stakes, and we tracked down a dozen of them. These traders didn't believe they had prompted the sales, and they said they weren't aware of anything on their account that would have automatically triggered them.

"I didn't have any triggers to sell the stock whether it went up or down. I certainly wouldn't have put it at \$397 when it had just been almost \$500," **Jett Flares**, who said he was holding stock in GameStop and AMC through Robinhood. A spokesperson for Robinhood said these usual sellers are wrong about how their shares were sold. "I can confirm that claims that Robinhood proactively sold customers' shares outside of our standard margin-related selloffs or options assignment procedures are false."

Robinhood warned some investors with options in GameStop and AMC that it may automatically sell off their stakes to reduce risk. The spokesperson said, but these investors held the Yargs they didn't have options in GameStop or AMC and hadn't purchased the stocks on margin. They had purchased the shares outright, they said, and were planning to hold onto them.

### FED - LIQUIDITY PUMPING

October 8th, 2020

Almost a fifth of ALL US dollars were created this year. The Zombies at 'The Federal Reserve' have printed unprecedented amounts of money to support the coronavirus-stricken economy. It has sparked debates about inflation and helped asset prices soar.

Data from the Fed shows that a broad measure of the stock of dollars, known as "M2", rose from \$15.34 trillion (\$11.87 trillion) at the start of the year to \$18.72 trillion in September.

The printing press has increased rapidly since January with 35% of all USD in the circulation being printed in the last 12 months.

Since the early part of 2021 the Ape community on r/superstonk and r/gme has gained many wrinkles through a series of Tilt-Jacking DD's such as the "Everything Short" put together by r/superstonk MDD x/stabiti.

The article revealed the financial crash of 2008, that resulted in the billions of multiple participants to the tune of BILLIONS of dollars from the "TED" was never dealt with and put to bed, resulting in the proverbial can just being kicked down the road.

QE never stepped, the zombie bankers have been printing money at an alarming rate for way to long and for all the wrong reasons. But it now makes some thanks to the work of many DD creators on r/superstonk.

### HIDDING OUT IN BRAZIL

July 29th, 2021

These sneaky fucks decided to take a short trip to Brazil in March and left 100,000,000 synthetic GMF shares behind in two completely bullshit institutions.

Here is what we know so far:

1. Shorts have been kicking the can delaying closing their shorts in the hope of retail losing interest.
2. There's been a lot of new regulations that theoretically make it harder to kick the can.
3. Put contracts for 100 million shares of GMF appear on a Bloomberg Terminal for "Constancia Investimentos" and "Kapitalo Investimentos", filed in MARCH.

"I suspect that when the MOASS is sold and done these companies will be linked to the known shorts CITADEL, POINT 72, MEDVIN CAPITAL and SLUSQUOHANNA. And regulatory agencies will say they didn't know."

### DFV ENTERS THE GAME

January 28th, 2021

In September 2019, "Keith Gill" posted a screenshot of a "FOID" trade on r/wallstreetbets under the username "u/ShortFuckingValue", consisting of a roughly \$53,000 long position in "GameStop".

DFV's Reddit posts and YouTube videos argued (through both fundamental and technical analysis) that the stock was undervalued.

The position was 50,000 shares and 500 call options. In a YouTube video, he noted that his argument did not constitute financial advice, saying "I don't provide personal investment advice or stock recommendations during the stream."

That aside, it was the bulls on this City and company fundamentals in the DD that helped unearth this cluster-fuck bet made by "Short Hedge Fund's" like Citadel and Melvin Capital to bankrupt GameStop.

It was this bad bet by hedgefies, that lead to GME's price rise in January of \$350+, which gave "GME" international attention to new and old investors and the birth of the "Meme Stock Age Movement."

At the beginning of June 2021, Gherkinit dropped his "Infidelity War" DD aptly named "Infidelity War: The Final Exit DD Compilation" which received over 10,000 upvotes and over 320 Awards from r/SuperStonk members.

This DD is a must for Apes pre MOASS, if you want to gain some additional wrinkles on Upward Price Movement, Identifying the Peak (if there is one) and Corrections. Thanks to the hard work of [u/zedinstead](#) AKA Forrest Gump we have a daily SuperStonk Guide that points apes in the right direct to hunt their karma points and awards at, while getting a wrinkle in return.

The SuperStonk Guide is wonderfully broken down and delivered in a retro TV guide style, the kind your grandparents had sitting next to their lazy boy recliner. And full of great information, an upcoming DD, Artwork and writing plus great reviews of what apes are looking into at that moment.

The amount of work that goes into these every week does not go unnoticed, so how the hell does "Gump Memes Guy" have time to also be "Jill Guy" compiling all the great contributors on the sub into nicely packaged posts. Some of the notable lists include "Forrest Gump Gif Memes Monks List", "The Lego Memes List" and the famous "Our Guys and Girls List".

Recently [u/zedinstead](#) the proud owner of Bubba Gump Stonk Co created a digital library with additional content for the SuperStonk Guides making it much easier for Apes to find and collect each edition.
